DISPENSING TECHNOLOGY | POSTMIX SYRUPS
SUSTAINABLE

The environment is important to us! As a strong signal of our commitment to sustainable production we turn the walls of

our buildings into green walls. This saves energy, neutralizes carbon dioxide and brings back nature to the industrial zone of Lannach.

GRAPOS

GRAZER | POST-MIX | SYRUP

A SUCCESS STORY

PRESIDENT AND CEO OF GRAPOS
KR WOLFGANG ZMUGG

GRAPOS WAS AWARDED
THE COAT OF ARMS OF AUSTRIA,
(ÖSTERREICHISCHES STAATSWAPPEN)
THE HIGHEST STATE RECOGNITION
FOR COMPANIES
IN THE COUNTRY.

.....

YOU CAN FIND OUR CERTIFICATES AT
www.grapos.com

.....

Our company has been operating since 1963 as a renowned beverage producer specializing in gastronomy.

From the start we have concentrated exclusively on the production of post-mix drinks and the development of the corresponding technology. GRAPOS, short for Grazer Postmixsirup, is a brand that has become an indispensable part of the beverage and catering industry in Europe today.

The post-mix syrup business has developed into to a true success story over the decades: In 1973 the first production started in a garage on Mitterstrasse in Graz; in 1982 the post-mix syrup production was transferred to Triesterstrasse in Graz. Due to the high demand, an expansion of the production facility was necessary in 1998 and since then GraPOS has been the most modern Post-mix syrup production facility across all of Europe. Since 1999, the well-known GraPOS post-mix syrup has been produced and bottled in compliance with the European hygiene standards (HACCP). We can proudly describe ourselves as the post-mix pioneers of Europe.

One principle has accompanied us in all those years of change and continuous growth: the highest standard is OUR standard. Our proven concept is a harmonious interplay of all components, from the initial ingredients to the ready-to-serve beverage in the glass. The high quality of the raw materials, their perfect processing, a seamless distribution network, and our trend-setting dispensing technology guarantee our customers the highest quality from one, single source.

USP WHAT MAKES US UNIQUE

Everything from ONE single source
and in the highest quality with a clear
commitment to sustainability.

POST-MIX SYRUP:

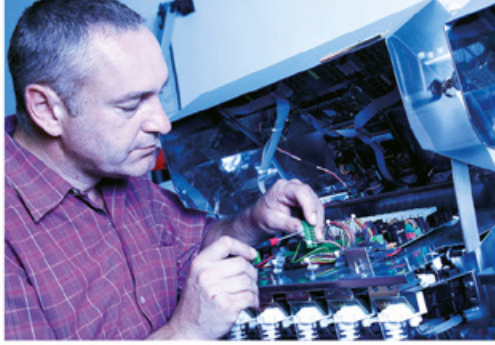

The Grapos product range currently includes over 100 different flavors of syrups and concentrates. Aside from our classic line of softdrinks and seasonal flavors, our assortment also includes specialty syrups for functional drinks, wellness and organic beverages. The production of syrups for 100% pure organic juices as well as organic beverages in open dispensary is unique in Europe.

DISPENSING TECHNOLOGY:

An optimal result starts with perfect planning. That is why we support our customers in the design, selection and financing for a tailor-made dispensing system. Our offer ranges from classic post-mix systems to extensive computerized systems, which are integrated into commodities management and logistics.

SERVICE:

364 days a year, our well trained and dedicated technicians and staff are available to swiftly and efficiently meet the needs, requests and concerns of our customers. It is in our best interest to guarantee optimal maintenance and ongoing checks of your post-mixing systems, as a consistently high quality of Grapos drinks is of greatest importance for the success of our brand.

EUROPE'S MOST MODERN
POST-MIX PRODUCTION

Highest QUALITY
is our STANDARD.

As the most modern syrup producer in Europe, we see it as a matter of course to undergo these strict certification processes of our quality and hygiene management: ISO 9001 and HACCP.

The commitment to quality means for us and our partners the tireless commitment of each individual employee to ensure an overall quality assurance. By certification according to ISO 9001, this process is carefully documented and continuously improved.

Compliance with strict hygiene standards is of great importance for the production of our high-quality product. HACCP - a self-control system in accordance with the requirements of the World Health Organization (WHO) - was originally developed for NASA and is today the most demanding hygiene certification for safely produced food.

Grapos is Europe's first and currently only company to offer organic quality in a postmix syrup product, with a 90% smaller ecological footprint compared to other products.

ANALYSIS FROM THE UNIVERSITY
OF TECHNOLOGY IN GRAZ:
"Their system of providing drinks is an essential
environmental benefit in a factor of 10 compared to
all competitors. Grapós is close to sustainability."

UNIV. PROF. DR. NARODOSLAWSKY,
GRAZ UNIVERSITY OF TECHNOLOGY

Delicious softdrinks in a glass

WITH AN ECOLOGICALLY SMALL CO₂ FOOTPRINT

Think green.
Drink green!

SUSTAINABILITY IN A GLASS.

Climate change is one of the biggest challenges of our time. We are meeting this challenge with our sustainable beverage concept.

As an innovative company, we strive for constant optimization of our products and technology, based on the needs of our customers and in accordance with our environment. The University of Technology in Graz has calculated the ecological and carbon dioxide footprint of the Grapos beverage concept:

We were confident that we would do well.
But in fact, we did great!

THE COMPARISON ASSURES

Our ecological footprint is 90% smaller than that of bottled beverages.

Even when considering a glass bottle is expected to have a product life cycle of 50%, the CO2 footprint of a Grapos beverage remains 90% smaller than a similar drink in a reusable glass bottle.

ALSO, WHEN DRINKING GRAPOS YOU REDUCE YOUR OWN ECO FOOTPRINT

Every venue saves up to 44% CO2 and about 40% on energy during beverage cooling. Refrigerators are no longer needed because the beverage is cooled directly at the tap of the dispensing system. You therefore save yourself the investment of expensive cooling technology and high energy costs.

In the future, every venue that works with the Eco-friendly Grapos concept, is allowed to inform the guests that with every Grapos drink sold, they are actively contributing the protection of the environment.

This is good for the image and for the sales - and above all for our planet.
For further information on this study, please contact us. www.grapos.com

ECO-FRIENDLY SERVICE

We focus on sustainability and climate protection.

- **90% LESS CO2** emission
- **40% ENERGY** savings

POST-MIX

THE MOST EFFECTIVE
BEVERAGE SYSTEM IN THE WORLD

MIXED AND COOLED ONLY WHEN DISPENSED
AT THE PUSH OF A BUTTON. THAT IS EFFICIENCY.

Bottles, empty containers, and a full warehouse are things of the past.
Environmentally friendly distribution with a small footprint and extreme
energy savings - that's the future

THE ADVANTAGES

- ✓ ICE COLD and always FRESH
Enjoy the perfect soft drink - our Schankomat technology guarantees the highest quality.
- ✓ COMPACT DESIGN
With our system, water is mixed IN the dispensing unit right before serving - that means your drinks are always crisp and you save a lot of storage space.
- ✓ ECONOMICAL AND EFFECTIVE
No use of bottles, cans, or bulky plastic containers in any phase of the production and delivery process.
- ✓ SUSTAINABILITY IN A GLASS
The ecological footprint is around 90% smaller than that of a bottled beverage.
- ✓ AVAILABILITY - OUR CUSTOMER SERVICE IS UNMATCHED
Wherever and whenever you are operating your venue, we are ready to assist - even outside standard office hours.
Please contact us for further information.

Softdrinks exclusively for GASTRONOMY

BEVERAGES | TECHNOLOGY | SERVICE

BAG-IN-BOX

THE PACKAGING SYSTEM FOR POST-MIX SYRUP -
UNIQUE IN EUROPE

THE ADVANTAGES

- ✓ EASY TO CONNECT and refill
- ✓ VARYING PACKAGING SIZES
allows even small companies to have a wide selection
of flavors and styles.
- ✓ ABSOLUTELY PURE
No change in color or flavor even after long storage times.
- ✓ MAXIMUM STORAGE
Compact, rectangular and easy to stack
By using Grapós your storage volume will be reduced by more than 80%.
- ✓ ECO-FRIENDLY
Both the carton and the inner bag are recyclable.

**A HOLISTIC DISPENSING SYSTEM
EXCLUSIVELY FOR GASTRONOMY**
BEVERAGES | TECHNOLOGY | SERVICE

We design and install complete solutions for dispensing and controlling. From a single source and factory, our company produces everything, from the post-mix syrups in eco-friendly bag-in-boxes to our signature Schankomat computer dispensing system.

**TOP COUNTER
SCHANKOMAT X5**

This unit offers 5 post-mixing taps. Cooling is integrated. The stainless steel body is powder-coated and can be adapted to every ambience.

**TOP COUNTER
SCHANKOMA X8**

This device is powerful and efficient. It offers up to 8 different Post-mixing taps, which can also be used for still or soda water. Each tap can be replaced by a pre-mix tap (i.e. for beer). Integrated cooling guarantees excellent tapping results.

**CARBONATOR
SCHANKOMAT C5**

This circulation carbonator provides an extra boost of tap power.

**DISPENSING SYSTEM
GRAPOS T**

The new dispenser Grapos Model T combines new design with proven technology. Equipped with 6, 8, 10 or 12 post-mixing taps, the unit offers a wide variety of products with guaranteed Grapos quality.

**TOP COUNTER
SCHANKOMAT X6T**

A state-of-the-art device with a modern design and compact dimension. With either 5 or 6 post-mix taps and the capability for still and soda water delivery. The integrated dry cooler guarantees consistent dispensing and fast deployment.

**CARBONATOR
SCHANKOMAT C3**

For high dispensing volumes and a maximum of 2 dispensing heads.

**CARBONATOR
SCHANKOMAT C1**

For normal dispensing volume and a single dispensing head.

**POST-MIX-PISTOL
WITH TOP COUNTER MOUNT**

Pistol with valve block
Pistol in Grapos mounting system.
